### **Notice of Disclosure of Information**

Information regarding your insurability will be kept confidential except that Beneficial Life Insurance Company or its reinsurers may make a brief report to the Medical Information Bureau. Upon request by another insurance company, to which you have applied for life or health insurance or to which a claim is submitted, the Medical Information Bureau will supply such company with the information it may have in its files. Beneficial Life Insurance Company or its reinsurers may also release information in its file to its reinsurers and to other life insurance companies to which you may apply for life or health insurance or to which a claim is submitted.

Upon receipt of a request from you, the Medical Information Bureau will arrange disclosure of any information it may have under your name. ### **Notice to Proposed Insured**

The law requires you to be advised that in connection with your application for reinstatement of insurance, an investigative consumer report may be prepared whereby information is obtained through personal interviews with your neighbors, friends, or others with whom you are acquainted. Such reports are usually part of the process of evaluating risks for life and health insurance. Inquiry may be made into your character, general reputation, personal characteristics, and mode of living.

You have a right to access and correct the information we collect about you, except that information which relates to a claim, civil, or criminal proceeding. ### Notice And Consent For HIV-Related Testing Which May Include AIDS Virus (HIV) Antibody/Antigen Testing

To determine your insurability, Beneficial Life has requested that you provide a sample of your blood, oral fluid extracted from cheek and gum tissue, or urine for testing and analysis. All tests will be performed by a licensed laboratory.

Tests may be performed to determine the presence of antibodies or antigens to the Human Immunodeficiency Virus (HIV), also known as the AIDS virus. The HIV antibody test that we perform is actually a series of tests done by a medically accepted procedure. The HIV antigen test directly identifies AIDS viral particles. These tests are extremely reliable. Other tests which may be performed include determinations of blood cholesterol and related lipids (fats) and screening for liver or kidney disorders, diabetes, and immune disorders.

All test results will be treated confidentially. They will be reported by the laboratory to Beneficial Life. When necessary for business reasons, in connection with insurance you have or have applied for with Beneficial Life, Beneficial Life may disclose test results to others involved in the underwriting and claims review process. If the HIV test is positive, the results will be reported to the local health department or the State Department of Health, and if Beneficial Life is a member of the Medial Information Bureau (MIB, Inc.), Beneficial Life may report the results in a generic code which signifies only non-specific blood test abnormalities. If your HIV test is normal, no report will be made about it to the MIB, Inc. Other test results may be reported to the MIB, Inc. in a more specific manner. The organizations described in this paragraph may maintain the test results in a file or data bank. There will be no other disclosure of test results or even that the tests have been done except as may be required or permitted by law or as authorized by you.

If your HIV test results are normal, no routine notification will be sent to you. If the HIV test results are other than normal, Beneficial Life or your designated physician will contact you. Beneficial Life may also contact you if there are other abnormal test results which, in the Insurer's opinion, are significant. Beneficial Life may ask you for the name of a physician to whom you may authorize disclosure and with whom you may wish to discuss the results.

Positive HIV antibody/antigen test results do not mean that you have AIDS, but that you are a significantly increased risk of developing AIDS or AIDS-related conditions. Federal medical authorities have concluded that persons who are HIV antibody/antigen positive should be considered infected with the AIDS virus and capable of infecting others.

Positive HIV antibody or antigen test results or other significant blood abnormalities will adversely affect your application for insurance. This means that your application may be declined, that an increased premium may be charged, or that other policy changes may be necessary.

I have read and understand this Notice of Consent for Blood Testing Which may Include AIDS Virus (HIV) Antibody/Antigen Testing. I voluntarily consent to the withdrawal of blood from me by needle, the testing of that blood, and the disclosure of the test results as described above.

In the event of a positive HIV test result, I authorize Beneficial Life to send the test results to the following health care professional for post-test counseling and for Health Department reporting purposes:

\_\_\_\_\_  
Physician's Name

\_\_\_\_\_  
Physician's Address

In the event of a positive HIV test result and no health care professional is designated above, I authorize Beneficial Life to contact me.
